

ACM 70/250 XLR and 3/8"

High quality condenser microphone

The ACM 70/250 XLR and 3/8" is an excellent condenser gooseneck microphone with versatile multifunction capabilities. A bi-dual capsule with four different directivity patterns offers a wide range in its application. The microphone is especially appropriate for rooms with difficult acoustic conditions and with a lot of reverberation. The highly sensitive membrane of the microphone transfers even quiet passages extremely clear and natural with the highest standard. The microphone offers an extremely high acoustic feedback security and minimizes ambient noise exceptionally well. The microphone is available in different lengths.

Phantom powering	24-48 Volt
Frequency response	60-18,000 Hz
Directivity pattern	cardioid – super cardioid – hyper cardioid -omnidirectional
Deviation of nominal curve	± 1 dB
Sensitivity	8.5 mV/pa
Electrical impedance	200 Ohm
Rear damping	20 dB
Connection	XLR with a 3 m cable or 3/8"
Surface	nickel-plated or black anodized
Length	390 mm
Weight	150 g
Special lacquering	NEXTEL grey/white
Brand	AVE
