

ACM 70/350 ABH

Condenser microphone with plug tripod and ground sleeve

The ACM 70/350 ABH is an excellent condenser gooseneck microphone with versatile multifunction capabilities. A bi-dual capsule with four different directivity patterns offers a wide range in its application. You can switch to cardioid, supercardioid, hypercardioid and omnidirectional directly at the connector. The ACM 70/350 ABH is only available as a complete unit with ground socket.

The MT steel pipe with XLR plug contact is secured against twisting through an exact guide groove.

Phantom powering	24-48 Volt
Frequency response	60-18,000 Hz
Directivity pattern	cardioid - super cardioid - hyper cardioid - omnidirectional
Deviation of nominal curve	± 1 dB
Sensitivity	8.5 mV/pa
Electrical impedance	200 Ohm
Rear damping	20 dB
Connection	XLR 3-pin
Surface	nickel plated or black anodized
Length gooseneck	350 mm
Total length tripod and microphone	1550 mm
Special colours	NEXTEL grey/white
Brand	AVE
