Slender and exclusive passive sound columns

Description:

Sound columns in very slender and exclusive design with very high audio pressure. By the implementation with the new developed and qualitatively high-quality 2"-broadband chassis with a nominal loading capacity of 15 watt this sound column is suitable very well for the application in the most difficult rooms. The 100-volts transformer allows the adaptation in full, half and quarters permits achievement. The sound column exists of a stable aluminum case free of resonance in modern timeless design, the decoration front is a small hole metal cover. The standard colour is RAL 9010 powder-coated, special colours are available.
